Dear Mayor Nadenicek:

Re: Elysian (North) Dump (LS-007), S 36, T 109N, R 24W

During the Summer of 1980 the above-referenced site was inspected as a part of an inventory conducted by the Minnesota Pollution Control Agency (MPCA) in accordance with Criteria for Classification of Solid Waste Disposal Facilities and Practices (Federal Register, September 13, 1979), promulgated under the authority granted by Section 4004(a) of the Resource Conservation and Recovery Act (RCRA) of 1976 (Public Law 94-580). This inspection indicated that solid wastes have been deposited at this location recently. Deposition of solid wastes at any location in the State without first obtaining a permit from the MPCA is a violation of Minn. Rules SW-4 and SW-5.

The presence of uncovered solid wastes at this location may be presenting real and aesthetic pollution problems. The MPCA, therefore, requests that this dump site be terminated in complete accordance with Minn. Rule SW-12 (copy enclosed). Upon termination the enclosed "Disposal Site Closure Record" should be completed and returned to this office. Each of the points in Regulation SW-12 and the "Disposal Site Closure Record" should be adhered to even though some of them may not pertain to this particular site.

Your response to this letter within thirty (30) days is required. Please address your written or verbal response along with questions you may have to:

John Moeger
Minnesota Pollution Control Agency

March 19, 1973

It is recommended that you work with your project engineer and your attorney in preparing the necessary material to present before the Board. We also suggest that your engineer and your attorney appear with you at the Board meeting as you may wish them to formally present your variance request and they may also be called upon to answer questions.

Please contact us for any further information required. We will be available to meet with you, your engineer and attorney if you wish to discuss in detail the preparation of your formal appearance before the Agency Board.

⁰
Yours very truly,

Floyd J. Forsberg, P.E.
Director
Division of Solid Waste

Dec. 9

March 20, 1973

Mr. Perry Simons
Elysian, Minnesota 56026

Dear Mr. Simons:

On January 17, 1973, the Agency denied your permit application dated November 17, 1972, with additional material received through December 6, 1972, for the construction and operation of a sanitary landfill, Angel Sanitation Sanitary Landfill, in Section 35, T100N, R24W, Village of Elysian, Le Sueur County on an existing land disposal site.

On March 19, 1973 you indicated by phone to the Solid Waste Division that you wish to appear before the Agency Board to formally request a variance in order to obtain a permit. We have tentatively included your variance request in the agenda for the April meeting of the Agency Board, scheduled for Monday, April 9. However, it is necessary to receive a formal written request from you for an appearance before the Board. This written request must be received by Thursday, April 5, in order for you to remain on the April 9th agenda.

Three separate variances must be requested from the Agency Board. A variance will be necessary on each of the three following points:

1. The fill area is within shoreland because it is less than 1000 feet from Lake Tustin (actually 600 feet from Lake Tustin);
2. The fill area is within shoreland because it is less than 1000 feet from Lake Elysian (actually 450 feet from Lake Elysian);
3. The fill area is less than one mile from a municipal well (actually 550 feet from the Elysian municipal well) and also is within the zone of influence of the Elysian municipal well.
